

GM LAND

Own Your Pixel Paradise: Connect, Create, and Collaborate in the
Token-Powered Neighbourhood – where Digital Land Ownership meets Social Interaction

1. Mint

Become a part of web3 history. \$8 might make you notable.

✓ = \$8 = 1 Tree Planted

Buy a Check for \$8 and we plant a tree for each sold. (We donate 12.5% of the proceeds and planting 1 tree costs \$1). Each Check also counts as a Community Vote where you get to decide how the Community Treasury should be used!

2. Trade your Checks for Land

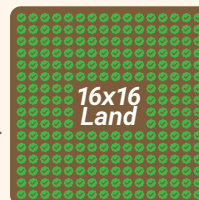

- ✓ x128 → 32x32 Land
- ✓ x512 → 64x64 Land
- ✓ x2048 → 128x128 Land

x8 →

x32 →

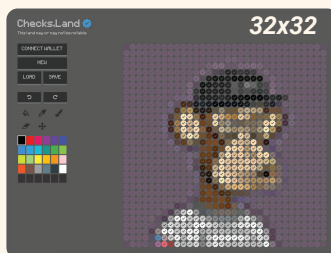

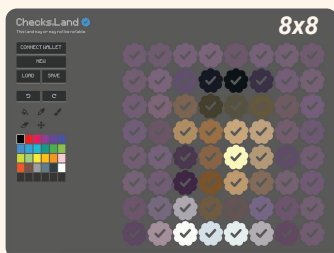

There are 5 different land sizes that you can claim. Once you trade Checks for Land you can't trade them back but Checks or Land can be traded an NFT marketplace like OpenSea, also known as the secondary market.

3. Utilise

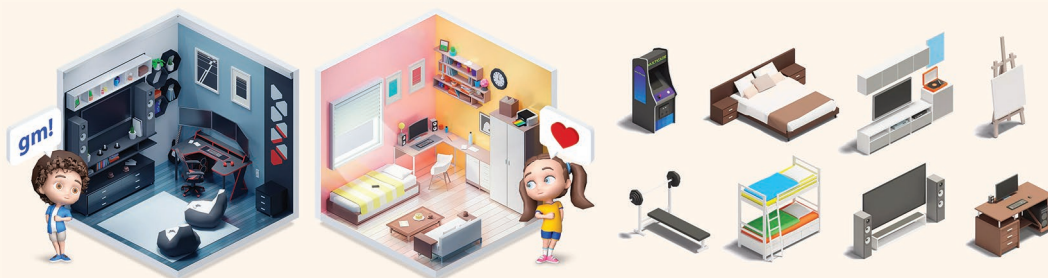

Use your land to draw, express, promote. Put yourself on the map and be cemented in web3 history - map generated hourly and every version is archived on IPFS, forever.

Brand partnerships will unlock special, linkable and fungible blocks.

Not to scale obviously, more checks = more real estate

Customise your own social space to interact with others on GM.Land
